## CONGRESSIONAL BIODIESEL TOUR SERIES CONTINUES – JOIN US

Our next event will focus on California and the benefits of biodiesel and renewable diesel to carbon reductions, air quality, environmental health and American jobs. California is the top market for biodiesel and renewable diesel, which generate about 45% of the state’s carbon credits each year.

Later this year, we will highlight the Washington-area’s use of biodiesel to reduce emissions. Many DC Department of Public Works heavy-duty vehicles are moving to 100% biodiesel.

Invitations to Congressional Staffers will be sent soon for the Summer Tour. Contact Tom Verry, Executive Director, NBF at [tverry@biodiesel.org](mailto:tverry@biodiesel.org) for more information.
